

SPECIAL SESSION (SS1.7)

“Trends in Energy Storage for Future Grids”

Madeira Island, Portugal

www.ice-conference.org

Storage – A technology for changing the energy paradigm

Presentation of papers with the following topics:

- Energy storage in the distribution grids and at end-costumers
- Energy storage solutions for advanced resilient prosumers
- Energy storage for intelligent cities and neighbourhoods
- Energy storage and game changer in energy industry

The presentations will be followed by final discussions and conclusions

Target Attendees

- H2020 Storage4Grid, Nobel Grid, WiseGrid, other projects.

Chair:

- Prof. Mihai Sanduleac (mihai.sanduleac@gmail.com), University Polithenica of Bucharest (Romania)

Co-Chair:

- Dr. Maurizio Spirito, Istituto Superiore Mario Boella (Italy)

Organizing Committee:
